DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Anthony Azure on May 27, 2005.

The application has been amended as follows:

- a) Claim 1, line 10, please add: --counter-- after phase: "state machine".
- b) Claim 11, line 9, please add: --counter-- after phase: "state machine".
- c) Claim 21, line 12, please add: --counter-- after phase: "state machine".

Allowable Subject Matter

- 2. Claims 1-30 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests an bi-directional data synchronization between different clock frequencies as the present application. Data synchronization system by Snyder (US 5,422,914) is a very close art to the present application. However, Snyder failed to teach some distinct features as taught by the present application. In specific, the present application teaches providing a first clock signal having a first frequency to a state machine counter; providing a second clock signal

Art Unit: 2634

having a second frequency that is an integer multiple of the first clock frequency to the state machine counter; applying the first clock signal to reset the state machine counter to an initial state; incrementing the state machine counter with the second clock signal wherein the state machine counter has an integer number of states equivalent to the ratio of the second clock signal frequency to the first clock signal frequency; generating an intermediate clock signal with the state machine counter wherein the counter produces an output signal whenever the state machine increments through all states to return to the initial state; and applying the intermediate clock signal to synchronize data between the first clock frequency and the second clock frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
